ROYAL STEWART

ROYAL STEWART (1956)

Plant Patent No. 1339

Description: A truly remarkable new gladiolus variety that has been widely acclaimed for its consistently fine performance under an extensive test program throughout the United States and Canada. The lightly ruffled florets are five inches in diameter and are of good substance. They are a clear light red and the long flower-heads frequently carry up to 12 flowers open at one time. Growth is vigorous and healthy, with the total height of the plants running about 5 feet. On the occasions when it has been exhibited at gladiolus shows, Royal Stewart has proved to be an outstanding winner of top awards.

The right to reproduce the All-America varieties for resale purposes or to sell cut flowers is reserved.

"ALL-AMERICA" Gladiolus Selection Winners

APPLEBLOSSOM (1956)

Plant Patent No. 1517

Description: A gladiolus of utmost delicacy of coloring, the predominating hue being snowy white with a faint touch of cream in the throat and an exquisite flush or corona of cool rose pink at the edges of the petals. Up to 8 to 10 trimly tailored florets, about 5 inches in diameter and of very heavy substance, are open at a time on spikes up to 5 feet tall. A vigorous, easy grower that performs excellently with only average culture.

CARIBBEAN (1957)

Patent Applied for. Year of Introduction 1957

Description: The delicate blue tones of this exciting novelty present an unusual combination of rare blue-violet petals handsomely embellished by a rich, deep violet throat and a small cream spear. CARIBBEAN opens from 9 to 11 precisely styled florets at one time in formal, double-row placement. It possesses a quality uncommon to many varieties and almost a rarity among "so-called blue glads", that of extreme vigor. In every way, CARIBBEAN displays top performance. It consistently produces tall, well-proportioned spikes and unusually healthy bulbs. It is the first distinctly ruffled blue-violet gladiolus. Every flower lover will want this striking novelty in his garden. Its refreshing beauty will make it a sure-fire winner in its class at flower shows.

MAYTIME (1957)

Patent Applied for. Year of Introduction 1957

Description: A light-hearted charm surrounds this brightly colored glad. The gracefully ruffled deep, pure pink florets with their contrasty large white throats bring back the memory of the freshness of May-blooming flowers. MAYTIME is a lithesome glad of good height. It readily opens 8 to 10 florets on spikes of five and one-half feet tall. A robust grower, MAYTIME has wonderful plant health and makes fine, plump bulbs. You will love Maytime for its long ribbon of color, for the silky taffeta sheen of its petals, and for its remarkable ease of growth. An ideal flower for either cutting or exhibition and a gem for the home garden. See picture on next page.
